

Guide letter 1: Wilderness protection

Include the following points in your letter:

In order to curb commercial tour operators, four wheel drive, trail bike and horseriding groups and enhance protection of Kosciuszko's fragile lands:

- all wilderness proposed in the environment group's Plan for Environment Protection and Restoration should be protected under the *Wilderness Act*, and
- the plan of management should require the powerlines between the Bogong, Goobarrangandra and Bimberi Wilderness and bisecting the Main Range to be relocated at the end of their engineering life.

What steps will you take to ensure the environment groups' proposed Tabletop and Jagungal wilderness extension over the Main Range are declared under the *Wilderness Act, 1987*?

Could you please advise me regarding the status of the studies proposed for wild rivers in Kosciuszko National Park and steps will you take to protect these rivers?

Will you restore the Goodradigbee River by removing the aqueduct diverting its headwater flows to Tantangara Dam?

Signed
