

Guide letter 3: Stop resort development in the park Include the following points in your letter:

I oppose the regime outlined in the Alpine Resorts Plan which allows developer driven expansion of resorts in the Park.

I oppose the amusement park activities and private real estate expansion that the Alpine Resorts Plan permits, it attacks nature and is not related to the park's alpine environment.

I request that the Baird Government:

support a moratorium on resort development in the Park, including private chalets and apartment blocks; prevents construction of the apartment block style developments in Perisher Valley;

develops an accommodation policy which places resort development outside the Park in "gateway towns" with a public transport system into the Park;

relocates the resorts out of the Park when their leases are renegotiated or expire;

bans cloud seeding and increased snow making as a response to climate change and the rising snow line.

Please inform me what steps the NSW Government will take to reduce the ecological footprint of the alpine resorts inside Kosciuszko National Park?
